1. please change log image from jpg image to gif image.
   when load app, frist show this gif image, after 2-3 sec, show first page again
2. font(in current html) is not very clear and too light. Very tired.

Please change font color (Not only red area, but also all font) like as skype.
3. please change all icon (in current html) like as skype.

these icons are very simple. Please change all icons (in current html) more beautiful like as skype.
4. popup window in current html is not same as mockup.

Please change above Currnet popup window like as mock file(line at top and bottom, button position, icon size, font color(same as No.2), input field layout)

Remove WebOffice

Are you sure you want to remove this WebOffice?
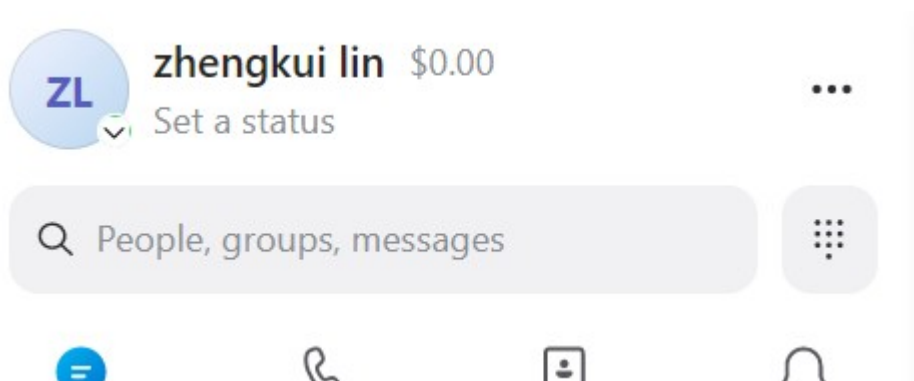

Remove   Cancel

(mockup file)

please change look at icon size, font color, line, button layout (please design like as above mockup file)
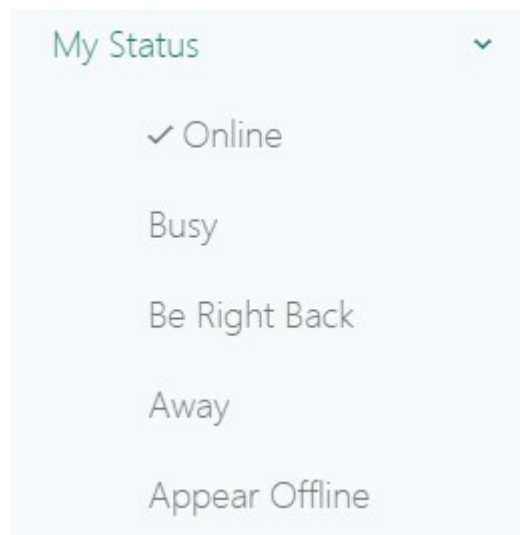

5. please change user status function

FlyingBird Web Messenger

Jack, Lin
Status Setting

Q Search

Chat   Contacts   Recording   Message

› Published Recording Files(1)

› Shared Recording Files(1)

› My Contacts(1)

please change above function to skype function

ZL   zhengkui lin $0.00
Set a status

Q People, groups, messages

when mouse on status green point, small green circle looks like as above state.(arrow)

and when click arrow, it will show lists like as above picture.
In this time, list has to include our status list.

And delete 'my status' list in setting field.

FlyingBird Web Messenger

« 1 2 3 4 5 »

we want scroll bar instead of page info, all list has to exist in one page.

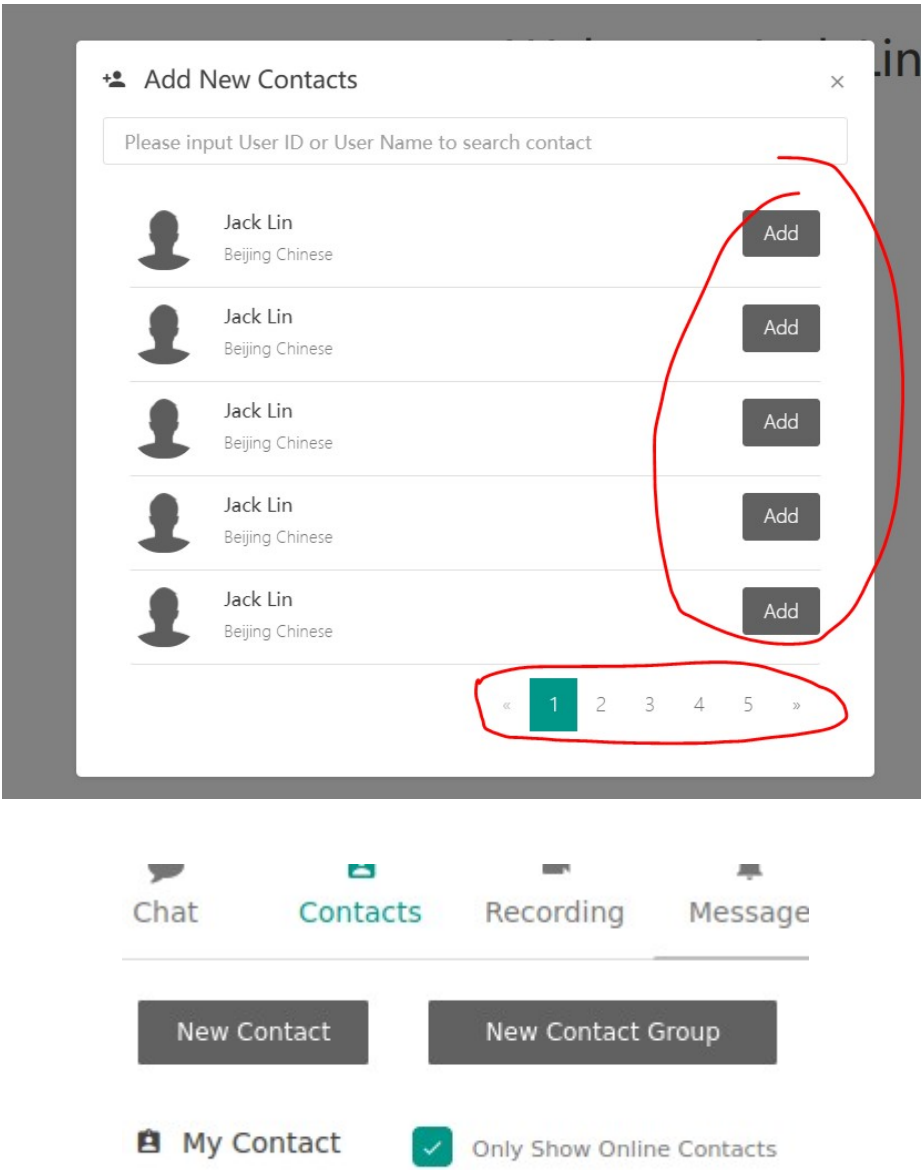

Above picture is same as before.(delete page info)

7. please append new item in this field

append 'missed calls' list like following

8. please change button style. Please change all button More smart and more beautiful

9. please insert 'My contacts' and 'Contact Group' into contact field

insert these items to following field

10. please append arrow function.
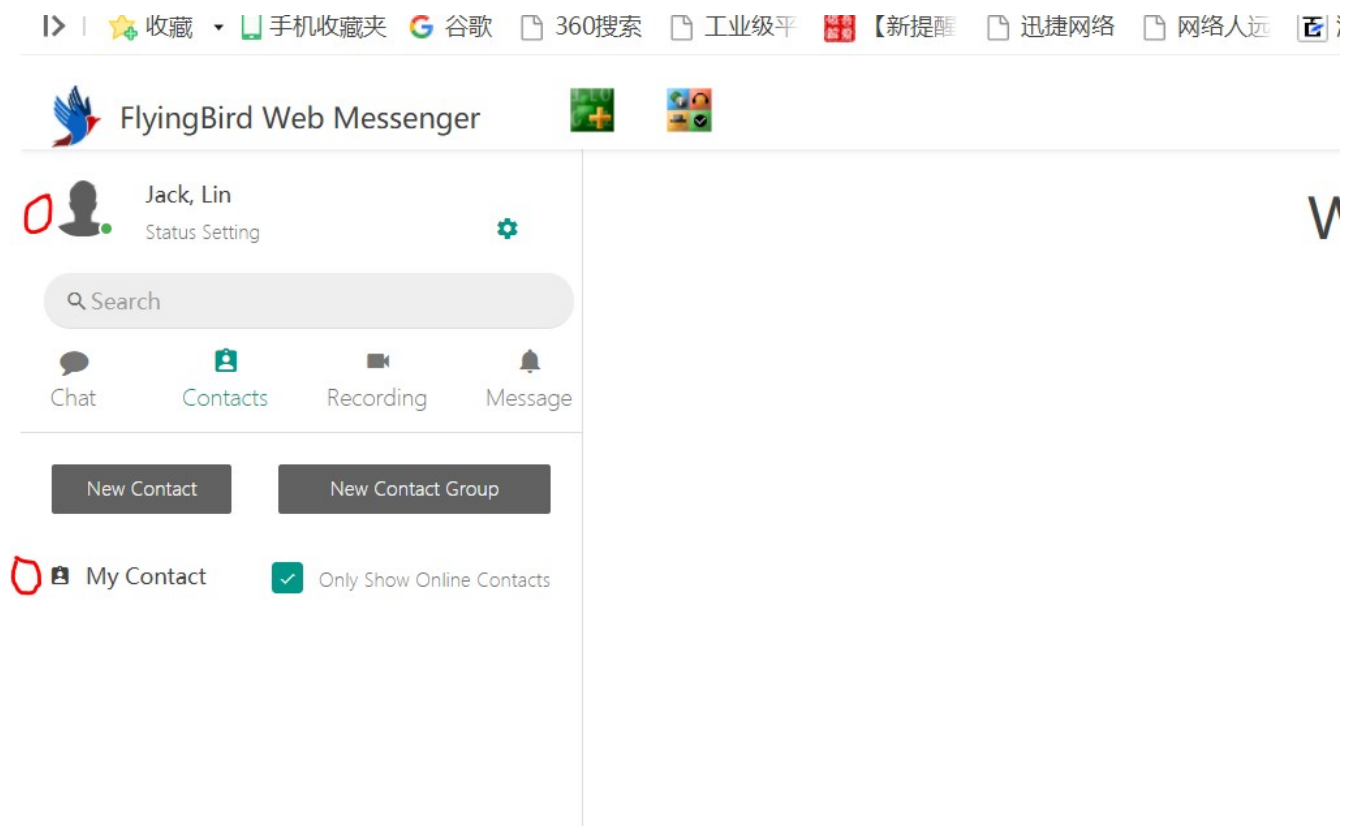

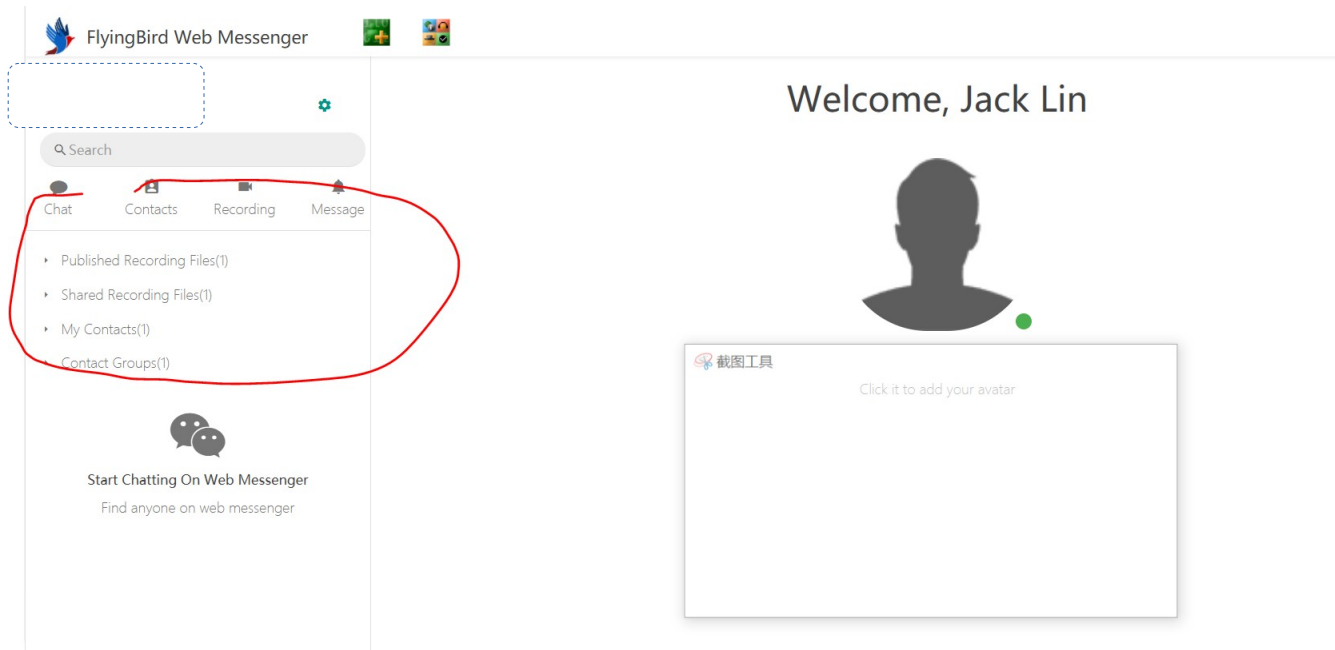

In this state all lists are not shown,but when click it , it will show lists

please apply it in other fields

**

you can design from start-point without using this html file.
